The following information is provided in accordance with California Government code Section 7550:

This document is one of a series of reports prepared for the Bay Area Toll Authority (BATA)/Metropolitan Transportation Commission (MTC) for the Regional Measure 1 Toll Bridge Program. The contract value for the monitoring efforts, technical analysis, and field site work which contribute to these reports, as well as the report preparation and production, is \$3,068,993.00.

### REGIONAL MEASURE 1 TOLL BRIDGE PROJECTS

#### REGIONAL MEASURE 1 TOLL BRIDGE PROGRAM

In November 1988, Bay Area voters approved Regional Measure 1 (RM 1) and authorized a standard auto toll of \$1 for all seven state-owned Bay Area toll bridges. The additional revenues generated by the toll increase were identified for use for certain highway and bridge improvements, public transit rail extensions, and other projects that reduce congestion on the bridges.

RM 1 identified nine specific bridge and highway improvement projects as eligible for funding from the toll increase. The projects identified by RM 1 and their status of development are depicted in the map on the facing page and can be itemized as follows:

#### Northern Bridge Group Projects:

- 1. Widening of the existing Benicia-Martinez Bridge (completed; not included in this report)
- 2. Construction of a new bridge parallel to the existing Benicia-Martinez Bridge
- 3. Replacement of the existing western span of the Carquinez Bridge (open to traffic)
- 4. Major rehabilitation of the existing Richmond-San Rafael Bridge
  - Trestle and fender rehabilitation
  - Deck rehabilitation
- Construction of an eastern approach (Richmond Parkway) between the Richmond-San Rafael Bridge and Interstate 80 near Pinole (non-Caltrans project; completed)

#### Southern Bridge Group Projects:

- Construction of the West Grand Avenue connector to the San Francisco-Oakland Bay Bridge (completed; not included in this report)
- 2. Widening of the existing San Mateo-Hayward Bridge and eastern approach to six lanes (completed)
- 3. Improvement of the Interstate 880/State Route 92 interchange
- 4. Improvements to the western approaches to the Dumbarton Bridge
  - US 101/University Avenue interchange reconstruction (non-Caltrans project; completed)
  - State Route 84 (Bayfront Expressway) widening (completed).

#### MTC, BATA, AND THE CALIFORNIA STATE DEPARTMENT OF TRANSPORTATION (CALTRANS)

As the regional transportation planning agency for the San Francisco Bay Area, MTC is responsible for transportation planning, coordinating, and fund programming in the nine counties surrounding the Bay.

With SB 226, MTC, as the Bay Area Toll Authority (BATA), has also assumed certain duties previously held by the California Transportation Commission, including responsibilities for the programming, administration, and allocation of all toll revenues (excluding the seismic surcharge) from the state-owned toll bridges in the Bay Area.

Caltrans continues to be responsible for the ongoing operation of the state-owned bridges, including the collection of tolls, as well as the maintenance, rehabilitation, and capital improvement of the bridges.

#### PROJECT MONITORING PROGRAM

This report focuses on monitoring project cost and schedule performance for the Regional Measure 1 Toll Bridge Improvement Projects, as measured against approved budget and schedule milestones. The report provides comprehensive project status information at three levels of detail:

- Color-coded executive summary of Regional Measure 1 projects status (program level)
- Detailed status of individual bridge projects (project level)
- Supplemental project and contract information, including budget adjustments, approved construction change orders, and project and contract level cost data, in the appendices.

# **EXECUTIVE SUMMARY - STATUS OF REGIONAL MEASURE 1 PROJECTS**

| NORTHERN       | BRIDGE GROUP  | COST  | SCHEDULE |
|----------------|---|---|----------|
| New Benicia-N  | Martinez Bridge   |   |          |

2 04001/Jan

#### **EXECUTIVE SUMMARY - STATUS OF KEY ISSUES AND DEVELOPMENTS**

- On the new bridge contract, superstructure construction continues on the Martinez side and foundation work continues in the strait. Deck concrete is in place from the south abutment to Pier 3, and superstructure soffit and stem concrete is in place from Pier 3 to Pier 4. In the strait, pile casings are driven to tip at all 12 piers. Rock sockets are complete at Piers 9 and 16, and installation continues at Piers 8 and 17. Pier 9 column concrete is at full height.
- Additional costs and delay continue to be expected on this contract in regards to installation of rock sockets, modifications to the superstructure design, and additional support costs. Caltrans is working with the design engineers and the contractor to resolve the design/construction issues. Caltrans will report to BATA as the issues are clarified.
- On the I-680/I-780 interchange contract, foundation and concrete operations continue. On the I-780 to I-680 connector overpass, deck concrete is in place from the east abutment to Bent 7, superstructure soffit and stem concrete is in place from Bent 7 to Bent 5, and superstructure formwork is in place from Bent 5 to the west abutment. Foundation pile and rock socket installation continue at Bent 18 on the Benicia shoreline for the transition structure from the new bridge.
- On the toll plaza contract, footings are in place for the additional toll plaza canopy supports and falsework fabrication is underway. On the Operations Building, mechanical work continues, and electrical wiring installation is underway for the security, alarm, and closed circuit TV systems. Concrete operations are in progress for the courtyard patio.
- On the I-680/Marina Vista interchange contract, foundation and concrete operations continue on the Mococo overcrossing. Concrete placement is complete for all bents and the abutments. Deck construction continues southward from the north abutment to Bent 6 with two of the three deck sections poured. Falsework erection for superstructure construction is also in progress northward from the south abutment.
- The replacement bridge opened to traffic on November 11, 2003. Installation of seismic monitoring equipment is ongoing on the bridge. Concrete work is in progress to enclose the south anchorage chambers. On the north approach, earthwork continues on the toll plaza parking area.
- The cost status code for the project is "yellow" due to construction claims and increasing support costs. Caltrans and Bechtel are reviewing these costs to determine funding impacts.
- Construction completion of this contract is forecast for May 2004.
- On the south approach and interchange contract, the I-80 Crockett Viaduct opened to traffic on November 11, 2003. The on-ramp from Crockett to westbound I-80 opened on December 9, 2003. Kendall and Vista Del Rio streets have been re-opened to traffic. Concrete operations continue for the westbound and eastbound off-ramps with installation of barrier rail and closure pours.
- On the trestle replacement, demolition and pile installation continue eastward along the interior and exterior of the existing eastbound and westbound trestles. Interior pile cleanout and concrete placement is in progress at Bents 27 through 29. On the westbound trestle, exterior pile installation has progressed to Bent 28. Pile caps are in place at Bents 1 through 12. Seven precast deck sections have been installed.
- The cost and schedule status codes for the project are "yellow" while Caltrans reevaluates the scope and schedule of the deck rehabilitation work. Rehabilitation of the deck cannot begin until the seismic work on the bridge is completed, currently forecast for 2005.

#### EXECUTIVE SUMMARY - STATUS OF KEY ISSUES AND DEVELOPMENTS

| • | On the bridge-widening contract, both the new westbound and the reconstructed eastbound trestles are complete and fully operational. Caltrans has accepted the contract and is in the process of resolving claims and closing the contract. Although final settlement of outstanding claims may require utilization of project contingency, a project budget change is not anticipated. |
|---|---|
|   |   |
|   |   |
|   |   |

- The Federal Highway Administration (FHWA) approved the Final Environmental Impact Statement Report (FEIS/R) for the project on December 29, 2003. A Record of Decision from FHWA is expected soon after the required 30-day comment period.
- The Caltrans Project Report was completed on December 31, 2003. Caltrans is currently preparing the plans, specifications, and estimates (PS&E) for the project. Sixty-five percent PS&E is forecast for completion in February 2004. One hundred percent PS&E is forecast for November 2004.
- Advance right of way acquisition (ROW) has started
- Based on the delayed project delivery and the associated escalation cost, the status code for the project cost is "yellow." As the engineering design progresses, Bechtel will further review the cost estimates.

- On the Bayfront Expressway widening contract, the widened expressway officially opened to traffic on July 29, 2003. Project closeout occurred on January 15, 2004.
- A follow-on contract has been awarded for environmental mitigation at the Ravenswood Triangle area. The work involves wetland reconstruction and habitat restoration for the salt-water harvest mouse.

6 04001/Jan

<sup>&</sup>lt;sup>1</sup> For the Richmond Parkway, values shown represent the portion funded by BATA.

<sup>&</sup>lt;sup>2</sup> Due to project delays and other difficulties associated with deep water foundations, project costs for the New Benicia-Martinez Bridge are expected to significantly exceed the budget.

#### SCHEDULE STATUS SUMMARY

<sup>&</sup>lt;sup>1</sup> For the Richmond-San Rafael Bridge Rehab, San Mateo-Hayward Bridge West Approach Planting, and Dumbarton Bridge West Approach projects, the dates shown reflect construction completion; the existing facility remains open to traffic during all phases of construction.

<sup>&</sup>lt;sup>2</sup> Completion of the Benicia-Martinez Bridge is expected to be delayed 12 to 24 months beyond the current schedule date of December 2004.

#### NEW BENICIA-MARTINEZ BRIDGE

The existing Benicia-Martinez Bridge provides Interstate 680 access across the Carquinez Strait between Contra Costa and Solano counties. This project will construct a new parallel Benicia-Martinez Bridge east of the existing span that will include the following features:

- Five northbound lanes on the new bridge (four mixed-flow lanes and one slow-vehicle lane) that will allow conversion of the existing bridge to southbound traffic only
- A new bicycle/pedestrian lane on the existing bridge
- A new toll plaza south of the new bridge in Contra Costa County with 17 toll booths, including two highoccupancy-vehicle (HOV) bypass lanes
- Reconstruction of the Interstate 680/Marina Vista Road and Interstate 680/Interstate 780 interchanges

I-780 to I-680 Connector Overpass Looking East

New Bridge Pier 9

Marina Vista Interchange - Bent 4 to Abutment 9

#### **Current Activities:**

- On the new bridge contract, deck concrete is in place from the south abutment to Pier 3 and soffit and stem superstructure concrete is in place to Pier 4. Rock socket installation continues at Piers 8 and 17. A rotator platform is being assembled and installed at Pier 6. Repairs to pile casings at Pier 7 are forecast to be completed in early February. Column concrete operations continue at Pier 9. The precast footings for Piers 8 and 13 are complete at Mare Island. Further precasting of footings is on hold until the Pier 8 footing is installed.
- On the I-680/I-780 interchange contract, deck concrete is in place on the I-780/I-680 connector overpass from the east abutment to Bent 7, soffit and stem superstructure concrete is in place from Bent 5 to Bent 5, and soffit and stem superstructure formwork is in place from Bent 5 to the west abutment. On the Benicia shoreline, pile/rock socket installation continues at Bent 18. An access trestle is being constructed to facilitate the construction of Bent 20. Mass earthwork operations have been discontinued for the winter duration and storm water pollution prevention measures are in place.
- On the toll plaza contract, falsework is being fabricated to install the additional supports for the toll plaza canopy. On the Operations Building, installation of exterior aluminum composite panels is nearing completion. Interior work includes duct installation, wiring for lighting, security, and CCTV systems, and installation of sprinkler drops on the lower and main floors. The courtyard patio has been formed in preparation for concrete placement. Concrete has been poured for the cantilever deck at the upper courtyard.
- On the I-680/Marina Vista interchange contract, two of the three deck sections have been poured on the Mococo overcrossing between the north abutment and Bent 6. For the on-ramp to northbound I-680, sheet piling cofferdams are in place for foundation pile installation at Bents 2 to 6. A sheet pile retaining wall has been installed along the existing/temporary northbound on-ramp.

#### NOTES ACTION

**A.** In addition to the significant cost and schedule impacts associated with the pile driving/fish takes mitigation strategy, other significant cost increases have been identified. These cost increases are associated with difficulty in driving the foundation piles to required tip elevation, installation of the foundation rock sockets below the pile tips, adjustments to the design of the superstructure, and additional support services. The total additional costs may exceed \$250 million. An estimate of the revised project cost will be included in a future PMP report. Construction completion of the new bridge is expected to be delayed 12 to 24 months beyond the current scheduled contract completion of December 2004.

 ${\bf B.}\;$  Electrical work on the I-680/I-780 contract cannot be completed prior to completion of the New Bridge.

Caltrans is evaluating the costs and schedule impacts. Bechtel will evaluate these impacts as they are developed by Caltrans. BATA is evaluating strategies to fund the cost overrun.

Electrical work will be completed in conjunction with the New Bridge.

#### CARQUINEZ BRIDGE REPLACEMENT

The existing Carquinez Bridge carries Interstate 80 traffic between the cities of Vallejo and Crockett on two separate bridges: the 1927 bridge for westbound traffic and the 1958 bridge for eastbound traffic. While the 1958 bridge is being strengthened under Caltrans' seismic retrofit program, the 1927 bridge has been identified as being seismically deficient and will be replaced under the RM 1 program. The Carquinez Bridge replacement project will construct a new suspension bridge west of the existing bridges. The existing 1927 bridge will be demolished after the completion of this project. The project will incorporate the following features:

- Four westbound lanes on the new bridge (three mixed-flow lanes and one HOV lane)
- A new bicycle/pedestrian lane on the new bridge

Fender Installation at Tower 2

#### **Project Photos**

Crocker Viaduct and South Anchorage

Toll Plaza Parking Area Earthwork

#### **Current Activities:**

- On the replacement bridge and north approach contract, traffic was directed onto the new bridge on November 11, 2003 to begin Stage 3 (Phases 3 and 4) roadwork. Installation of call boxes and miscellaneous handrail continues on the bridge deck. On Towers 2 and 3, installation of earthquake monitoring instruments and work on miscellaneous stairs and electrical items continues. Dolphin and fender installation is in progress at Tower 2. Concrete operations are underway to enclose the chambers on the south anchorage. On the north approach, earthwork is in progress with placement and compaction of fill material for the new toll plaza parking area. Construction completion of the contract is forecast for May 2004.
- On the south approach and interchange contract, the on-ramp to westbound I-80 opened on December 9, 2003. Kendall and Rio Del Vista streets re-opened to traffic in early January 2004. Falsework removal is complete for the main viaduct. Closure pours and installation of shear keys, joint seal assemblies and barrier rails continue on both the westbound and eastbound off-ramps. Installation of the handrail for the pedestrian walkway is forecast for February 2004. In preparation for the deck rehabilitation of the 1958 bridge, transition roadwork is underway for the temporary toll plaza approach on the north end of the 1927 bridge. Completion of the contract is forecast for March 2004.

NOTES ACTION

**A.** Based on current information, Bechtel estimates that potential claims and additional support services costs may increase the total project cost by an additional \$20 million for a total project cost of \$500 million. Bechtel will assist in the review of potential claims and support cost increases on the project. The results of this review will be included in a future PMP report.

Caltrans is seeking additional information in order to properly evaluate these potential cost increases.

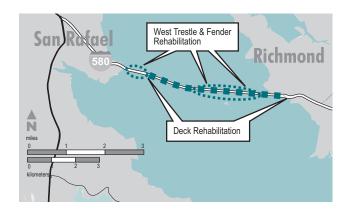

#### RICHMOND-SAN RAFAEL BRIDGE REHABILITATION

Completed in 1956, the Richmond-San Rafael Bridge provides access - via Interstate 580 - across San Francisco Bay between Marin and Contra Costa counties. Major rehabilitation of the bridge was specified in RM 1 to be eligible for toll funding.

Currently, there are two major rehabilitation projects planned for the bridge:

- The first project is to replace the western trestle (low-rise) section of the bridge near San Rafael and rehabilitate the ship collision protection fender system at various bridge piers. This rehabilitation work is being combined with a seismic retrofit project.
- The second project is to rehabilitate the existing concrete deck on the bridge. The cast-in-place concrete riding surface (deck) has been worn over

time due to traffic and exposure to the marine environment. This project will follow the completion of the trestle and fender rehabilitation project to avoid possible construction conflicts.

#### **Project Photos**

New 100 ft. Deck Sections

Existing Deck Sections on Left, New Deck Sections on Right

#### **Current Activities:**

- The west trestle replacement consists of rebuilding the eastbound and westbound trestles near San Quentin. The trestles are parallel for most of their length and diverge to carry traffic onto or from the upper or lower deck of the main bridge. The westbound trestle, serving the upper deck, is 2,844 feet (867 meters) between Bents 1 and 29; the eastbound trestle, serving the lower deck, is 3,635 feet (1,108 meters) between Bents 1 and 37. The trestle replacement procedure consists of reducing lane width, demolishing an 8 feet (2 meters) linear section of interior bridge deck, installing a temporary interior work trestle, and installing interior sixty-six inch (1,680 mm) cast-in-drilled-hole (CIDH) piles at the mid-span of every other existing 50-foot (15 meter) deck section. When installation of the interior piles is advanced, a similar operation is repeated on the exterior, where a section of exterior bridge deck is removed and exterior piles are installed. After installation of the piles, pile caps are cast in place below the existing superstructure, on the new interior and exterior piles. Following pile cap construction, one trestle at a time is closed at night for superstructure replacement. During closure, two of the existing 50-foot (15 meter) sections are removed and replaced with one new 100-foot (30 meter) precast section.
- Construction continues from west to east on the interior and exterior sections of the existing eastbound and westbound trestles. Interior pile installation is currently at Bent 30 of 37 with cleanout and concrete infill of the pile casings at Bents 27 through 29. On the westbound trestle, exterior pile installation has progressed to Bent 28 of 37. Pile caps have been installed from Bent 1 through Bent 12 and seven precast deck sections have been installed.

# **Project**

New Facility Open to Traffic

В

| NOTES  | ACTION  |
|--|---|
| <b>A.</b> The deck rehabilitation will follow the completion of the retrofit project. BATA expects the use of project contingency will be required to cover costs of escalation. | Caltrans is reviewing the cost forecast and the forecast completion date of the deck rehabilitation contract. |
| <b>B.</b> The existing facility remains open to traffic during all phases of construction.   | None.   |

#### SAN MATEO-HAYWARD BRIDGE WIDENING

In 1996, the western approach to the San Mateo-Hayward Bridge from U.S. Route 101 was widened from four to six lanes to match the configuration of the high-rise section of the bridge. The current project completed the widening work in this corridor along the low-trestle section of the bridge and its eastern approach to Interstate 880. The project includes the following features:

- Widening of the low-rise trestle and eastern approach from I-880 from four to six lanes with shoulders
- Extension of the existing west-bound HOV lane one mile west along the eastern approach from Interstate 880
- Construction of a new pedestrian/bicycle overcrossing of State Route 92
- Expansion of the existing toll plaza
- Improvements to the Hayward Shoreline Interpretive Center

Mini Toll Plaza

#### **Project Construction Progress and Photos**

Trestle looking west

Pedestrian Overcrossing

#### **Current Activities:**

• On the bridge-widening contract, construction is complete and both trestles are open to traffic. Caltrans accepted the contract on March 6, 2003 and is in the process of closing the contract and resolving claims on the project. Final settlement of outstanding claims may require utilization of project contingency.

 $<sup>\</sup>boldsymbol{A}. \;$  Final settlement of outstanding claims may require utilization of the project contingency.

Caltrans is currently working with the contractor to resolve outstanding claims

#### I-880/SR-92 INTERCHANGE IMPROVEMENT

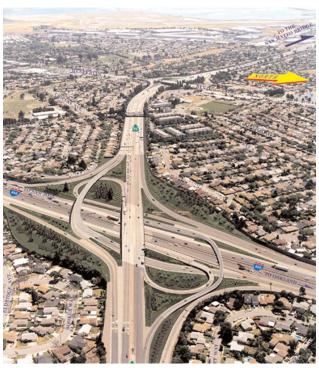

As part of an effort to improve traffic flow and to relieve congestion on the San Mateo-Hayward Bridge and its approaches, RM 1 identified the need to improve and reconstruct the Interstate 880/State Route 92 interchange. While still in the environmental clearance phase, the project proposes to modify the existing cloverleaf interchange to increase capacity and improve safety and traffic operations. Various alternatives are under consideration and are being assessed as part of the environmental process.

#### **Project Photos**

Alternative H Interchange; looking west

#### **Current Activities:**

- The Federal Highway Administration (FHWA) approved the Final Environmental Impact Statement Report (FEIS/R) for the project on December 29, 2003. A Record of Decision from FHWA is expected soon after the required 30-day comment period.
- The Caltrans Project Report was completed on December 31, 2003. Caltrans is currently preparing the plans, specifications, and estimates (PS&E) for the project. Sixty-five percent PS&E is forecast for completion in February 2004. One hundred percent PS&E is forecast for November 2004.
- Advance right of way acquisition (ROW) has started.
- Based on the delayed project delivery and the associated escalation cost, the status code for the project cost is "yellow." As the engineering design progresses, Bechtel will further review the cost estimates.

| NOTES | ACTION |
|-------|--------|
| NOILS | ACI    |

**A.** Due to the delayed delivery of the project, additional funds may be necessary for escalation. Bechtel has forecast a potential project increase of \$15 million, resulting in a total project cost of \$150 million.

BATA will prepare a check estimate when 65% engineering design is achieved.

#### **DUMBARTON BRIDGE WEST APPROACH PROJECTS**

RM 1 identified the need for improvements to the western approaches to the Dumbarton Bridge. Through coordination with the City/County Association of Governments of San Mateo County, two projects were identified for toll bridge funding:

- The first project, sponsored by the City of East Palo Alto, modified the U.S. Route 101/University Avenue interchange. This project was designed to alleviate traffic congestion and improve overall traffic flow to University Avenue and the Dumbarton Bridge.
- The second project, sponsored by Caltrans, widened the Bayfront Expressway (State Route 84) from the Dumbarton Bridge to the U.S. 101/Marsh Road interchange. The six-lane expressway section from the bridge to University Avenue is reconstructed with upgraded shoulders and lane widths. The existing expressway section from University Avenue to Marsh Road is widened from four to six lanes.

#### **Project Photos**

SR-84 East from Chrysler Ave.

SR-84 West toward Marsh Rd.

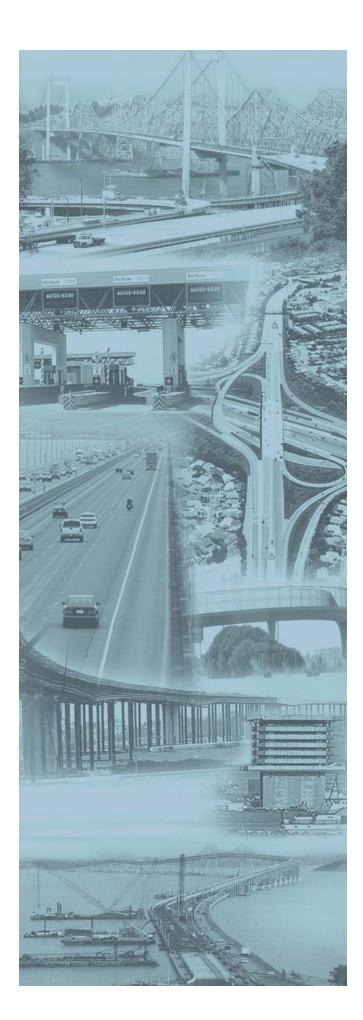

#### **Current Activities:**

- The Bayfront Expressway (SR-84) widening contract was officially opened to traffic on July 29, 2003. Punch list items have been completed and new traffic lights are operational at all intersections. Project closeout occurred on January 15, 2004.
- A follow-on contract has been awarded at the Ravenswood Triangle for wetland reconstruction and habitat restoration for the water harvest mouse.

# **APPENDICES**

Appendix A: Project Budget Adjustments
Appendix B: Current Approved Contract Change Orders
Appendix C: Project Cost Summary Details

# APPENDIX A - LIST OF PROJECT BUDGET ADJUSTMENTS

**DEFINITIONS:** 

Baseline Budget (June 2000): Baseline budgets as established by BATA in June 2000 for each project

within the overall program.

**Current Budget:** Budget currently serving as the baseline for monitoring purposes. The

current budget is equal to the established June 2000 budget, plus or

minus any adjustment as listed below.

#### **Project Baseline Adjustments**

| Date    | Description of Adjustment  |
|---------|--|
| 10/2000 | Current Budgets for allocated capital outlay adjusted by BATA to reflect current Caltrans construction contract allotments.  |
| 11/2000 | Current Budgets for the Benicia-Martinez and Richmond-San Rafael Bridge projects revised to reflect new funding from Non-BATA sources per agreements with Caltrans and a Prop. 192 refund from Caltrans related to the Carquinez Bridge project. |
| 01/2001 | Current Budget for the Benicia-Martinez bridge revised to reflect allocations by BATA.   |
| 03/2001 | Current Budget for the Carquinez Bridge revised by BATA.   |
| 10/2001 | Current Budget for the Benicia-Martinez Bridge revised by BATA.  |
| 12/2001 | Current Budgets for the Benicia-Martinez and San Mateo-Hayward Bridges revised by BATA.  |
| 06/2003 | Current Budget for the Bayfront Widening project revised by BATA.  |
|         |  |

# APPENDIX B - APPROVED CONTRACT CHANGE ORDERS (CCO) FOR JANUARY 2004 **BENICIA-MARTINEZ BRIDGE**

#### APPENDIX C - PROJECT COST SUMMARY DETAILS

The following sheets provide detailed cost information for each of the bridge projects. Capital Outlay Support (Engineering), Capital Right-of-Way and Capital Outlay are shown for each of the projects. The Project (BATA) Contingency, as well as the bridge projects totals, is shown at the end of each bridge summary.

#### **Definitions:**

- 1. Capital Outlay Support includes both Caltrans and Architectural/Engineering (A/E) consultant support.
- 2. Capital Right of Way includes acquisition, loss of goodwill, demolition, utilities relocations, relocation assistance, title costs, and sale of excess lands.
- 3. Capital Outlay includes construction bid terms, external third party agreements, state-furnished materials, supplemental construction work, and construction contingencies.
